g3ROG-actual - System Health Report

Archived snapshot originally published for the 2025 release cycle. This file is kept for historical reference after the 2026 markdown report replaced it as the main published snapshot.

Audit Snapshot

This report captures a point-in-time audit from 2025. Patch level, security posture, temperatures, fan speeds, and background processes may have changed since this snapshot was recorded.

System Summary

- Computer: g3ROG-actual
- OS: Windows 11 Enterprise 24H2 (10.0.26100.5074)
- DirectX: 12.0
- User/Domain: Redacted in archived public snapshot

CPU and Motherboard

- CPU: AMD Ryzen 7 9800X3D - 8C/16T @ 5.2 GHz
- Board: ASUS ROG Strix B650E-F Gaming WiFi
- Chipset: AMD B650E
- BIOS: AMI (07/21/2025)

Memory

- Total: 64 GB DDR5 (Corsair Dominator Titanium RGB)
- Effective Speed: DDR5-6200, CL30-38-38-80

Graphics and Displays

- Discrete GPU: NVIDIA GeForce RTX 4090 (23 GB VRAM)
- Integrated GPU: AMD Granite Ridge Radeon (2 GB)
- Monitors: 2x LG UltraGear 49-inch (2024), 2x Sceptre 30-inch (2019)

Storage

- Crucial T705 1 TB (Gen5 NVMe)
- Crucial T705 2 TB (Gen5 NVMe)
- Samsung EVO 2 TB x2 (SATA SSD)
- Total: 7 TB

Network

- Provider: Frontier Fiber
- Speed: 2.2 Gbps down / 2.3 Gbps up
- Ping: 5 ms (Secaucus, NJ)

Sensors

- CPU: 47 C (package)
- GPU: 33 C core / 44 C hotspot / 40 C memory
- RAM: 41 C
- NVMe: 34-48 C
- Fans: CPU 663 RPM, Chassis 607 RPM, AIO Pump 1681 RPM, GPU 1000 RPM (30%)
- Voltages: +12V 11.94, +5V 5.08, +3.3V 3.29

Benchmarks (AIDA64)

- Memory: Read 105 GB/s, Write 101 GB/s, Copy 99 GB/s, Latency 66 ns
- CPU: ZLib 1280 MB/s, AES 72 GB/s, SHA3 7900 MB/s
- FPU: Mandel 43K it/s, FP32 Ray 6700 KRay/s, FP64 Ray 360 KRay/s

Processes and Autostarts

- ASUS Aura/Armoury lighting, Adobe background services, NVIDIA/SteelSeries/Logitech/Elgato daemons
- Note: Heavy but normal vendor load. Nothing suspicious detected.

Security

- Windows Update: Last applied March 2025 (system was about six months behind at the time)
- Antivirus: Windows Defender active and current (as of September 2025)
- Firewall: Disabled
- Recommendation: Enable firewall and apply latest cumulative updates

Final Takeaway

g3ROG-actual was documented as a top-tier powerhouse rig running cool, stable, and efficient during the 2025 snapshot window.
